

BioG 002

Strategies for Improving Your Performance in BioG 102: A Questionnaire

Below are listed some changes in study methods or habits that students resolved to improve their performance in introductory biology might decide to make. Please circle the number, or numbers (up to **three**), of the changes in study methods that you think would be **most** beneficial to you, personally. (Since you are filling out this questionnaire in the BioG 002 class, “Attending 002” is not listed as an option.)

This questionnaire will be collected, and the results shared with you in a later BioG 002 class. You need not sign your name to the questionnaire.

1. Attend office hours of the BioG 102 or BioG 002 instructors more frequently.
2. Get into a biology study group with 1-3 other students.
3. Study my lecture notes more and/or more effectively and de-emphasize the textbook.
4. Study the textbook more and/or more effectively and de-emphasize the lecture notes.
5. Attend lecture more regularly.
6. Listen to recordings of the lectures more regularly.
7. Be more conscientious and consistent both in keeping up with assigned textbook reading and in reviewing lecture notes regularly.
8. Use the study guide for the textbook more regularly, for example as a source of multiple-choice questions for self-testing.
9. Use the on-line quizzes more effectively as a learning tool (for example, by using the questions as part of my review for exams).
10. OTHER (Please describe briefly in the space below.)
